Sebastián Díaz

FULL STACK DEVELOPER

Active, dynamic, with a very good analysis capacity. I'm a full stack web developer prepared to use my skills and knowledge, adding value to the projects and goals of the company.

PROJECTS

- **Wobble Searcher**

(React, React-Redux, RapidApi, JS, Tailwind)
Similar to google. It searchs for web page links, it can search and display images, videos and news. You can switch it to dark mode

- **Full Stack App Users-CRUD**

(Express, Jwt, Node, PostgreSQL, Sequelize, CSS, Hook-Forms, Html, React, Rest Api)
Full Stack app creates multiple users with personal data and displays them on the page. You can also edit data and delete the user.

- **E-Comerce**

(Next, Sanity, Css, JS)
Shows all the products for sale and their description. You can add them to the cart. It's easy to change the data information with sanity.

- **Weather Search**

(CSS, Html, TypeScript, React, Rest Api)
Similar to google. It searches for web page links, it can search and display images, videos and news. You can switch it to dark mode.

COMPETENCIES

Html	Css
Javascript	React
