ABOUT ME

Active, dynamic, with a very good analysis capacity. I'm a full-stack web developer prepared to use my skills and knowledge, adding value to the projects and goals of the company.

WORK EXPERIENCE

Software Engineer Full Stack
E- Commerce Factory SAS,
2023-May
Design, development and maintenance of a WMS (warehouse management system) using Angular, Laravel and MySQL. Collaborate with other development teams to identify and resolve technical issues. Clean, efficient and high-quality code development.

Full Stack Developer
Freelancer
2022-Apr   2023-Actual
Technologies used React, JavaScript, TypeScript, Angular, Java, NodeJS, PostgreSQL. Development and design of relational databases, RES APIs, web and mobile applications, and microservices integrations.

PROJECTS

E-Comerce
(Next, Sanity, Css, JS)
Shows all the products for sale and their description. You can add them to the cart. It's easy to change the data information with sanity.

Full Stack App Users-CRUD
(Express, Jwt, Node, PostgreSQL, Sequelize, CSS, Hook-Forms, Html, React, Rest Api)
Full Stack app creates multiple users with personal data and displays them on the page. You can also edit data and delete the user.

Weather Search
(CSS, Html, TypeScript, React, Rest Api)
 Similar to google. It searches for web page links, it can search and display images, videos and news. You can switch it to dark mode.
